PRE-PRESS

Prepress has witnessed unprecedented change as the industry advances to an all-digital workflow. Through our commitment to technology leadership, we continue to offer our customers productive and competitive high resolution digital imaging and file storage.

Hardware

- Apple iMac workstations and PC workstations
- Apple Xserve offering 100/1000baseT ethernet and network storage exceeding 1TB
- ADSL (Hi-Speed) Internet access
- HP Scanjet 8300 Professional Image Flatbed Scanner
- Fujifilm XMF Rip (PDF workflow) with JDF & CIP4
- Fujifilm BlackMagic open digital prepress system for (RIP-once : Output Many) workflow
- Fujifilm Luxel VX6000 CTP platesetter with XMF Rip

Software

- Acrobat PDF, InDesign, QuarkXpress, PageMaker, JDF Inposition, Photoshop, Illustrator, Word, Excel

Proofing

- HP LaserJet 8100 (B&W Letter & Tabloid)
- Epson Stylus Pro 11880 Digital Proofer
- Epson Stylus Pro 9600 Digital Proofer

Our Web Site

Send A File

Thanks to the convenience of our online file transfer module, there's no need to send a disk. You can easily send a file from your computer to ours in a matter of minutes. Just click on the "Customer Utilities" area and follow the simple steps.

PRESSES

DIGITAL Heidelberg NexPress 2100 - Four Colour

We are pleased to offer a digital printing solution that sets new performance standards for short run printing and full colour personalization. The NexPress allows us to match the quality, consistency and reliability benchmarks of offset printing while giving the ability to produce personalized communication pieces to increase loyalty and response rates.

Max. Sheet Size: 13.8" x 18.5"

Min. Sheet Size: 8.3" x 11"

Max. Print Area: 13.4" x 18.1"

OFFSET MAN Roland R500 - Six Colour with Aqueous Coater

Our MAN Roland 500 provides our customers with a fully automated 6-colour digital offset printing press with in-line aqueous coating capabilities. The special 6 page format allows higher productivity than standard formats. High quality printing products are achieved through CIP4 integration with pre-press, computer controlled inking, dampening and autoplating for maximum registration accuracy and a minimum of waste.

Max. Sht. Size: 23.23" x 29.13"

Min. Sht. Size: 8.27" x 11.02"

Max. Print Area: 22.83" x 29.13"

DISPLAY Fujifilm Acuity HD 2504 - Four Colour

The Acuity HD 2504 offers you the latest breakthrough in wide format UV digital imaging technology. Specifically designed for print applications requiring fine detail, high resolution images, the Acuity HD 2504 delivers both rigid and flexible point-of-purchase signage that hold up visually, even at the closest of viewings.

At the heart of the Acuity HD 2504 is a new imaging technology that enables each print head to produce variable size dots as opposed to traditional fixed-droplets. The printer's ability to jet droplets as fine as 6 picoleter produces sharp, precise images with smoother transitions and quarter tones: while jetting larger droplets up to 30 picoleter delivers denser, more uniform solid image areas.

Max Print Area: 48in. / 1.2m (W) x 96in. / 2.5m (L) (full bleed capability)

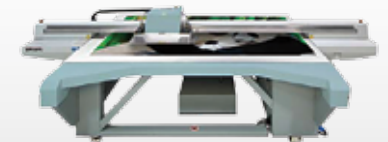

Max Substrate Thickness: 2in. (48mm)

FINISHING

Capital Colour Graphics has a long history of working with our customers and their creative vendors to produce unique, eye catching communications programs to promote your products and services. We provide a complete range of finishing capabilities.

- Baum 3-Head Paper Drill
- Bostitch Single Head Stapler
- Challenge Round Cornering Machine
- Challenge Single-Hole Drill
- Polar 115 - 36" Computerized Cutter
- Rollem TR Die-Score System
- Stahl TH56 Pile Feed Folder with noise hoods
- Stahl TH82 Continuous Feed Folder with noise hoods
- Heidelberg Stitchmaster ST100 with 6 pockets
- Shrink Wrapping System
- Vaccumatic Vicount Counter
- Perfect Binding, Coil and Wiro Binding
- Diecutting
- Laminating

CUTTING SYSTEM

Zund L-2500 Digital Die Cutter

The Zund L-2500 Digital Die Cutter combines sophisticated cutting technology with state-of-the-art material handling for high productivity.

- Controllable vacuum plate with 2x 2.2kW vacuum pumps and noise reduction enclosures
- 1kW router for cutting aluminum, wood, plexiglass
- Electric oscillating tool for cutting carton, leather
- Insert sleeve for vinyl cutting
- OptiScout automatic registration system

Max. Substrate Size: 70.5" (1.8m) x 98" (2.5m) x .78" (20mm) thick

LAMINATING SYSTEM

Seal Image 600md Laminator

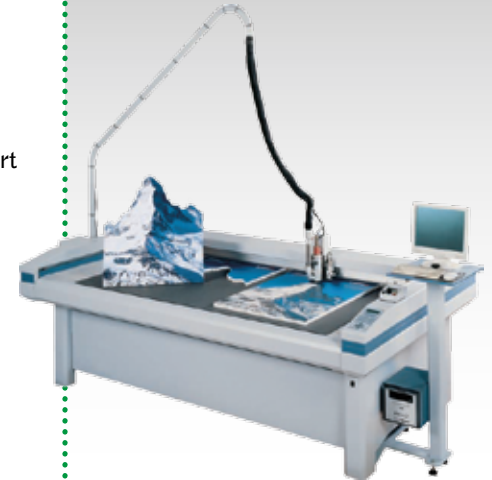

The SEAL Image 600md offers a dynamic combination of quality, functionality and value.

The Image 600md is capable of effortlessly producing the following display applications:

- Rigid Indoor Displays
- Rigid Outdoor Displays
- Floor Graphics
- Backlit Displays
- Pop-Up Displays

Mount, laminate and encapsulate materials: Up to 61" (1.55m) and 1.5" (38mm) thick from both sides
